About This Game

The treasure lies at a depth of more than 100 yards. That's a job for the Mad Digger!

Once Grandpa Pecos decided to share a secret with his grandson — there's a hidden treasure buried somewhere on the former mine. But there's one problem. The treasure lies very deep underground at a depth of more than 100 yards! Then the grandson thought about his friend, the Mad Digger. He's the only one to get things done.

Your task is to dig deeper and deeper until you find the treasure. It's not as simple as it seems. The oxygen runs out with every

descent, you need to extract minerals to improve your equipment and tools as well as to buy grenades and dynamite to make the descent faster.

Equipment description:

Pickaxe — your main tool. Upgrade it to dig faster and more efficiently.

Oxygen Tank — allows you to stay underground for a long time. Upgrade it to increase the time limit.

Drill — a big drill which allows you to pass the first layers much faster and collect more resources.

Grenade — has a small radius of action, but all the blocks blown up by a grenade never go waste, and if they contain something useful (resource or oxygen), you will take it.

Dynamite — has a large radius of action, it is very convenient when you need to quickly cover a considerable distance. Dynamite has a drawback when compared to a grenade: it destroys everything in its path, and if you blew a block with a resource, you won't get it.

RadWater — water with moderate radiation dose. It makes the Digger 10 times stronger and faster while active.

other games really need to copy this game's style of having one room. it works so well, with the huge bonus of no teleporting.

- + when you think it's done there's more.
- + good controls.
- + good use of locomotion (only natural movement, no teleport)
- + nice customizing of the room

- tedious
- repetitive stages to the game

overall really great fun.

feedback for dev (if they look at these): please have a way to mirror furniture, also another "phase" to the game would help break up the monotony. by phase i mean how the game has a "buy/sell/prep" phase and a "night" phase, something else to do during the day would be neat.

. A fun game that has focused on simple mechanics. Having never played the iPhone version but still having heard the Apple crowd gush over it, I was anxious to try this game out and it definitely delivers. Super addictive, very accessible but gets brutally challenging fast, lots of level variety and it runs on basically anything including my work laptop with Intel integrated graphics. The biggest concern many had is whether a game designed for touch screens translates into mouse control well and I can say there's no worry there. The nice is fast and intuitive and it even has a special mode for trackpads on laptops.

In short: This is a steal, get it.. good fun game love blowing cows up. its hine but after a lot of time it gets booooring. LET'S GET READY TO RUMBLE!!!! Must epic game of Ro SHameBo unless someone brings out a hammer and hits you on the head! Yes that can happen! For this to be a free game they put hard work in. I recommend trying this game out. The Streets are Yours!!! Now Rock on! Or cut some paper! Or write on some paper!. This is an initial early review from a short period of gameplay (will edit review after more gameplay). This is the kind of gameplay style that is needed to fill the old-school competitive shooter hole in VR gaming (think Quake and UT). My impression is it is incredibly good casual (or competitive) fastpaced fun. The environments are beautiful, framerate is great (caveat, see below) and the variety of guns are fun to shoot. I have yet to play a match without bots.

Note that when playing with bots, I noticed performance decreasing over time throughout the game (framerate drop, latency increase). This could only be fixed by restarting the match.

Eye tracker not working (tobii eye 4c), i bought this just for eye tracking purpose, goona wait for one day for developer reply, refunding after if there is no reply.. Wew,had a ton of bug in the start , but everything seems good right now ,if someone wanna play this game ,i think that will be a good idea, I'm looking for the next DLCs (i know this game has been released about 1 year in China) and the update for Tale of Wuxia (not the Pre-Sequel) too .

P/s : I used Architecture font to the game (.ini file) , I hope it will be useful for someone .. The game is good, the only thing that needs immediate attention are the tracks. They need to be a little wider, most of the time I dont want to go to the pit stop. But thats where I go, if the tracks where wider. I would have a chance to steer away.

The other problem is the handling of cars, the handling needs fixing. Cant control the cars very well, the controls are too sensitive.

The sound, graphics are great, but what I said above hinders it.. I cant forget this game ever. Just I can say BUY IT guys!. Fun but can be quickly tedious. I think this is another game that is only suited to playing on a tablet.
